

# Анатолий Яковлевич Фаенов

(27 апреля 1950 г. - 3 ноября 2017 г.)

3 ноября 2017 года на 68-м году жизни после тяжелой продолжительной болезни скончался замечательный человек и талантливый ученый, главный научный сотрудник ОИВТ РАН, д.т.н. **Фаенов Анатолий Яковлевич**.

Анатолий Яковлевич родился 27 апреля 1950 года в ст. Зимовники, Ростовской обл. После окончания в 1973 году физфака МГУ работал сначала в Физическом Институте АН СССР, а затем во ВНИИ физико-технических и радиотехнических измерений Госстандарта СССР. В 1997 году защитил диссертацию на соискание ученой степени доктора технических наук, в 1998 году был избран членом-корреспондентом Метрологической академии.

С 2006 года работал в ОИВТ РАН в лаборатории диагностики вещества в экстремальном состоянии. Анатолий Яковлевич одним из первых, будучи еще студентом-дипломником, осознал возможности применения эмиссионной рентгеновской спектроскопии для исследований в области физики высоких плотностей энергии. С этого времени его научная работа была посвящена разработке методов и средств радиационной диагностики плотной плазмы, экспериментальным исследованиям в области физики высокой плотности энергии по самому широкому спектру фундаментальных и прикладных задач.

Научная деятельность Фаенова А.Я. получила широкое международное признание. Им опубликовано 3 монографии и более 700 работ в ведущих российских и зарубежных научных журналах, процитированных свыше 7000 раз.

Он являлся признанным лидером в области экспериментальной рентгеновской спектроскопии плазмы. В ОИВТ РАН он формулировал новые направления исследований и разработок в области диагностики вещества в экстремальных состояниях, организовал долгосрочное сотрудничество ОИВТ РАН с ведущими мировыми научными центрами Японии, США, Китая, Италии, Израиля.

Нам будет не хватать его научной интуиции, преданности науке и нескончаемой энергии. Его целеустремленность, ответственность, активность всегда были примером для коллег. Память об Анатолии Яковлевиче навсегда останется в наших сердцах.
